EDUCATION

Crescent University
B.S. in Computer Science

Ogun, Nigeria
Expected Graduation, May 2027

EXPERIENCE

Lagos State University Of Science And Technology

Lagos, Nigeria

Technical Lead

Jul 2025 – Oct 2025

- Led a team of 5 students to design and develop a functional web project, delivering a responsive website using HTML and CSS and completing the project 2 weeks ahead of schedule.
- Oversaw setup of 10+ Windows laptops, configured software environments, and managed document organization to support over 50 student projects, ensuring smooth departmental operations.
- Assisted in exam preparations and organized student data, improving workflow efficiency and reducing manual errors by 30%.

Freelance

Lagos, Nigeria

Frontend Web Developer

Aug 2022 – May 2023

- Designed and built 27+ responsive websites and web applications for clients across industries using HTML, CSS, and JavaScript, improving user engagement by up to 40%.
- Delivered projects ranging from landing pages to interactive web apps, emphasizing performance, accessibility, and smooth user experience, completing 90% of projects ahead of deadlines.
- Collaborated remotely with clients to gather requirements, implement features efficiently, and provide ongoing support, serving over 20 clients successfully.

Lyfebites LEMP

London, England

Software QA Tester

Jul 2022 – Jul 2023

- Executed 20+ manual and exploratory test cases across multiple projects to ensure software quality and compliance with specifications.
- Identified, documented, and reported 50+ bugs, performing positive and negative testing scenarios, resulting in 30% faster issue resolution.
- Maintained detailed test reports and dashboards to support development improvements and bug resolution, improving team efficiency and tracking accuracy by 25%.

PROJECTS

Cloud Cost Calculator

Ogun, Nigeria

Team Lead

Nov 2025 – Dec 2025

- Developed a system to monitor AWS spending for multiple users and send real-time alerts when costs exceeded predefined limits, preventing potential overcharges of hundreds of dollars per month.
- Automated daily cost tracking using AWS CloudWatch (100% coverage of active services), AWS Lambda for processing, SNS for notifications (email/SMS), and S3 for storing historical reports.

Serverless Blog Website

Ogun, Nigeria

Team Lead

Oct 2025 – Dec 2025

- Built a fully serverless blog platform supporting **50+ posts and 100+ images per month** for multiple users.
- Implemented backend using AWS Lambda (Python), API routing with API Gateway, storage in DynamoDB, and image uploads in S3, achieving zero downtime for 3+ months of testing.
- Delivered a complete serverless architecture, eliminating the need for server management and reducing infrastructure costs by 100% compared to traditional server hosting.

SKILLS

Cloud and DevOps Tools: AWS (EC2, S3, VPC, IAM, CloudWatch, Lambda, API Gateway, Load Balancers, Auto Scaling, Subnets, Route Tables, NAT Gateway, VPC Endpoints, Security Groups, NACLs), Terraform, Docker, Serverless Architecture, CI/CD Pipelines, Git, Linux

Databases & Storage: DynamoDB, NoSQL, MSSQL

Security & Monitoring: IAM Policies, Least Privilege Access, Encryption, Secrets Management, CloudWatch Metrics & Logs, Log Insights, Distributed Systems
